## **Revised and Updated IIPP and EAP are posted!**

The Department Injury and Illness Prevention Plan and the Department Emergency Action Plan have been reviewed and updated. Highlights include:

- Revised injury/incident reporting structure and on-line form
- Peer/Self-Inspection frequency changed to annually
- Updated some links
- Collected forms into Appendix A
- Some minor editorial changes and updates to the EAP

Please be sure everyone in your work group has documented training on the IIPP and EAP. You don't have to print the document – a sheet with a link to the two documents is fine. Let me know if you'd like a links page.

*Questions or concerns? Give me a call or stop by 122 Chemistry.*

Thanks for your support of safety!
